

Monteringsvejledning / Mounting Instructions

M1 Downlight 230V

DK

- * Skal monteres af en autoriseret el-installatør
- * Overskrid aldrig lampens max Watt/spænding
- * Anvend 90°C installationskabel (70°C hvis kablet ikke berører lampecylinderen)
- * Godkendt til videresløjfning
- * Max 7,5 Watt LED / 20 Watt halogen
- * Afstand til nærmeste belyste overflade skal være minimum 50 cm.

Montering

1. Lav ø76 hul i loftet
2. Monter kabel og spænd aflastningen (2 stk)
3. Fastgør lampecylinderen i loftet
4. Monter front med lyskilde

EN

- * Must be installed by authorized electrician
- * Do not exceed the stated wattage/voltage
- * Use 90°C installation cable (70°C if the cable does not touch the lamp cylinder)
- * Approved for additional cabling
- * Max 7,5 Watt LED / 20 Watt halogen
- * Distance to nearest illuminated surface must be minimum 50 cm.

Installation

1. Drill ø76 hole in the ceiling
2. Connect the cable and tighten the cable release (2 pcs)
3. Mount the lamp cylinder into the cutout in the ceiling
4. Mount the front with the lightsource
